

## Transfer FAQ

### Transfers

You can transfer up to your entire 11 man squad per transfer window; transfers can be made only during transfer windows and must be completed before the deadline. If possible I would appreciate an email confirmation of any transfers you are looking to make. For emailed transfers the email received time is taken as when the request was submitted.

- Each transfer will cost £1. .
- Any transfers you make will become active after that window ends.
- All Transfers must comply with original rules – New player group lists will be provided, the week before the window.

You will notice on the new player lists that certain players have moved bands; this may affect how you wish to use the transfer window.

### Example

Your original squad had 3 Midfielders from the first band and 1 from the second band; however that last Midfielder has now been placed in the first band as well.

- If you make no transfers your team will remain as is, and will continue to score points you are not required to make amendments to revert back to the max of three players per band,
- If you make transfers but do not transfer out your four midfielders, you can make changes as you please but will not be able to transfer anyone else in from the first Band.
- If you make transfers including transferring out one or more of the four midfielders, you will only be able to transfer in players from the first Band up to the original limit of three players, i.e. if you transfer out 1 of the midfielders you will not be able to transfer in anyone from the first band as the other three will fill those spots, transfer out 2 midfielders and you can transfer in one player from first band and so on.

If you have any queries, please feel free to email me / speak to me and I will help as quickly as possible.

Any suggestions for additional information that might be useful also welcome.
